

WE SERVE BUSINESS OWNERS AND BOARDS

Know what your business is worth – and what it takes to grow, protect, or exit that value.

The challenge you face

Most business owners have no real idea what their business is worth until they need to know. By then, it is often too late to influence the outcome. Whether you are preparing for a sale, navigating a shareholder change, raising capital, or simply making better strategic decisions, understanding the value of your business is one of the most important things you can do.

How bizval supports you

We make business valuation accessible, affordable, and genuinely useful for owners and boards. Our valuations are not just a number – they are a lens through which you can see what is driving value in your business, what is holding it back, and what you can do about it.

- Independent valuations you can rely on for strategic planning, fundraising, and transactions
- Clear, jargon-free reports that boards and non-financial stakeholders can understand
- Benchmarking insights that show how your business compares to market peers
- Support for succession planning, exit preparation, and growth strategy
- Ongoing valuation tracking to measure progress over time

85% of businesses are not sellable. Understanding your value today is the first step to changing that. A quality business valuation could be the most important investment you make.

Built for owners, not just accountants

Graham Stephen built bizval because he saw how inaccessible and expensive traditional valuations were for business owners. Our tools and reports are designed to be understood and acted on – not filed away. We work with you to explain what the numbers mean and what you can do with them.

Trusted by owners across the globe

We have helped thousands of business owners across the USA, UK, EMEA and beyond, to understand, protect, and grow the value of their businesses. Whatever stage you are at, we can help you take the next step with confidence.
